

Project “Labplus – innovative technology for medical diagnostics” is implemented under Sub-measure 1.1.1 Industrial research and development work implemented by enterprises of the Smart Growth Operational Programme 2014-2020.

Grant agreement no. POIR.01.01.01-00-0297/19-00 of d. 13.11.2019.

#### THE GOAL OF THE PROJECT:

Development of a globally unique medical diagnostic technology

#### PLANNED RESULTS:

- Development of technology based on artificial intelligence methods to propose a set of examinations without the participation of a doctor and remotely suggest the causes of pathologies and recommend medical management
- A telemedicine application (for iOS, Android), in which the artificial intelligence technology developed in the project will be implemented for recommending and interpreting medical test results

PROJECT VALUE: 5 995 983,49 PLN

CONTRIBUTION OF EUROPEAN FUNDS: 4 746 548,44 PLN

The project is co-financed by the European Union from the European Regional Development Fund under the Smart Growth Operational Program. Project implemented under the competition of the National Centre for Research and Develop: Fast Track.
